

Favoman®

Range of application:

Favoman® is a ready-to-use, alcohol-based and lipid regulating disinfectant for the daily surgical and hygienic hand disinfection. It can also be used for the disinfection of the skin before simple injections and punctures and before surgeries.

Moreover it is usable for the disinfection of the skin rich in sebaceous glands and for cooling compresses. The preparation has a very quick efficacy with residual effect and fulfil the valid European test standards

Expertises:
